Sofia Anne Ondra

Some Notes:

- App was developed on optimizing performance for Android 8.x above
- App was tested to be able to run on Android 6.0 with 2GB of RAM. **There might be a 5 to 10 second white screen loading delay on older and weaker devices** before it goes to the main menu. This is due to the app loading all the bible data on the beginning. On newer phones, this is almost non-existent.
